

# Maximizer TM

## Manage Your Time...Manage Your Compliance

Call to learn how to keep your driver's in compliance with

### DOT Compliant Software Features

- Maximizer tm records any pre-plan in 2 minutes or less
- Our SARS (Safety Assist Reporting System) determines whether a trip can be accepted based on an 11 hour or less work schedule
- SARS will adjust the Pick-Up & Delivery times to the time zone of user's domicile
- SARS can maintain actual hours worked and displays hours driver can legally work each trip without human intervention
- The user of our software will be able to enter two or more pre-plans and the Trip Planner reveals real time work schedule for each trip
- Users can create home time schedules that show total amount of hours and miles they will be legal to work up to the desired request
- Our system will also display the amount of fuel for the entire trip and it will assist drivers in purchasing only the amount of fuel needed
- User will know the approximate deliver time of ever trip along with the required legal speed needed for that journey
- The logger generates automatic Electronic Log Sheets with suggested start driving time each day up to delivery
- The pre-generated log sheet comes with built-in alerts showing driver exactly where all violations will occur before trip even starts
- Our logger has Origin & Destination Wait Time fields that will display average wait times of every customer in our Trip Sheet form.
- The logger has a complete day button when depress will tally lines 3 & 4 and enter results in the HOS fields of the trip planner which keeps accurate of all hours worked
- We have a report generator that will:
  - (a) Show in form view all if any violations before submitting logs
  - (b) Has a change table at driver's can prove of any information accuracy and that info was entered at times implied
  - (c) Has ability to create expense report on certain data
  - (d) Able to call up pass trips accepted for loads pickup in a certain area
- We have the first ever system that can locate preferred truck stops for special fuel pricing
- We have a Maximizer TM Fleet that can help drivers to make sound decision when one head just isn't enough
- Stores trip information into a data base for settlement sheet comparison
- Keeps up with expenses for tax reporting purposes

These are some of the many features that our system can do which guaranties total DOT compliance and all of our features are accessible in 2 minutes or less.
